EDUCATION

Purdue University, *West Lafayette, IN*

Expected May 2028

B.S. in Computer Science; Minor in Management

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture

Extracurriculars: Intramural Sports, Two-time Team Captain; Persian Cultural Center, Secretary;
SWANA-affiliated, Information Team member; Purdue ARC, Rocket League Autonomy Team member

EXPERIENCES

Security Analyst, *Cloudflare - Internship*

May 2026 - August 2026

- Designed and shipped a production Python threat-intelligence pipeline ingesting public research from 6 sources and extracting 1,000+ malicious-domain indicators for analyst review.
- Designed an extensible feed adapter and registry system supporting RSS, REST, GitHub, JSON, and HTML sources while minimizing feed-specific implementation.
- Implemented safety controls to prevent false positives, duplicate submissions, compromised websites, and unsafe writes to shared infrastructure.
- Deployed containerized workloads to staging and production using Docker, Kubernetes CronJobs, Helmfile, Vault, and GitLab CI/CD.
- Built incremental processing, automated tests, monitoring, and outage alerting, improving pipeline reliability and preventing silent feed failures.

AI and Analytics SWE, *Rose.ai - Internship*

June 2025 - August 2025

- Integrated Posthog analytics into the website frontend, enabling user behavior tracking and insights
- Implemented secure authentication workflows for Chrome extension, improving reliability and user trust

Software Engineer, *Jamiez LLC - Internship*

May 2025 - August 2025

- Developed frontend features for the Jamiez app, improving usability and responsiveness.
- Connected customer service requests to a backend database, streamlining support workflows.

PERSONAL PROJECTS

Soccer World Cup Simulator and Predictor

November 2025 - January 2026

Built a website ([link](#)) giving users the ability to simulate and predict World Cup matches.

- Developed a web platform for World Cup match simulations, including a backend system that computes custom probabilities and odds models for each matchup.

Soccer Rules Website

April - May 2025

A website ([link](#)) describing the rules of soccer in depth.

- Created an educational website explaining soccer rules with interactive, scenario-based examples.
- Designed in-site quizzes and optimized the UI/UX for a clean, engaging learning experience.

SKILLS

Languages: C, C++, Java, JavaScript, Python

Frameworks: React, Next.js

Databases: MongoDB, Supabase

ML: PyTorch, Stable-Baselines

DevOps: Docker, Kubernetes, Vault, Gitlab CI/CD, Vercel, Railway

Tools: Git, GitHub

AI-Assisted Dev: Cursor, Copilot, Claude, ChatGPT

Spoken Languages: English (Native), Farsi (Native), Spanish (Proficient)
